Sustainability

In order to ensure sustainability of products, materials and our services we constantly research:

- What materials should be used in projects
- Where the products/materials originates from
- The manufacturing process and composition of the final products/materials
- Durability of products and materials
- Social responsibility practices
- End of Life management schemes

Design

Does the sustainability of the product influence its design?

Target Market

- This is a market worthy of investment
- Our key target market is the medium/high end
- This is less susceptible to market fluctuations
- The market is composed of ~70% consumer choice
 and ~30% reaction to consumer choice
- The importance of advertisement lies in the influencing of the 70% consumer choice creating a market driver for sustainable products

Old Concept

'Negative Proposition'

Stop Buying
Stop Flying
What not to do

New Concept

'Positive Proposition'

Informed Choice Greater Awareness What can be done

Summary

How we can help

- Implementing change
